

## *ICT Project: Currency- Converter with Fixed Exchange Rates*

*This presentation introduce our ICT  
project, a currency converter that uses  
fixed exchange rates. We will explain its  
key features, goals and potential  
benefits.*

# **Project Team**

## **Members**

**This project team consists of two students:Qasim Kayani, Ayan Nasir.Each member has contributed to the project.**

**Reg no:BCPE243023(QASIM)**  
**BCPE243004(AYYAN)**

## **Role**

**Each member has assumed a specific role.This division of labour has ensure smooth project progress.**

# Introduction

## Purpose

Our currency converter aims to provide a user-friendly and reliable tool for converting between different currencies, using fixed exchange rates.

## Benefits

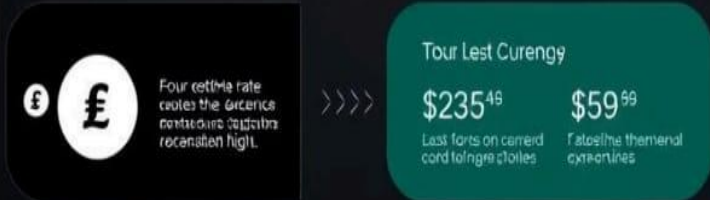

This project helps user avoid the complexities of fluctuating exchange rates, providing clear and predictable conversions.

## Target Audience

Our target audience includes individuals and businesses who require frequent currency conversions.

# CUR CUREICY CONVERSION

STEPS  
Currecy converter for all users  
7 CURRENCY CATEGORIES

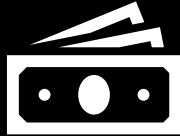

# Key Features

## User-Friendly Interface

The converter provides simple interface that is easy to understand & use, with clear instruction.

## Multiple Currencies

The converter supports a wide range of currencies, allowing the users to convert between various global currencies.

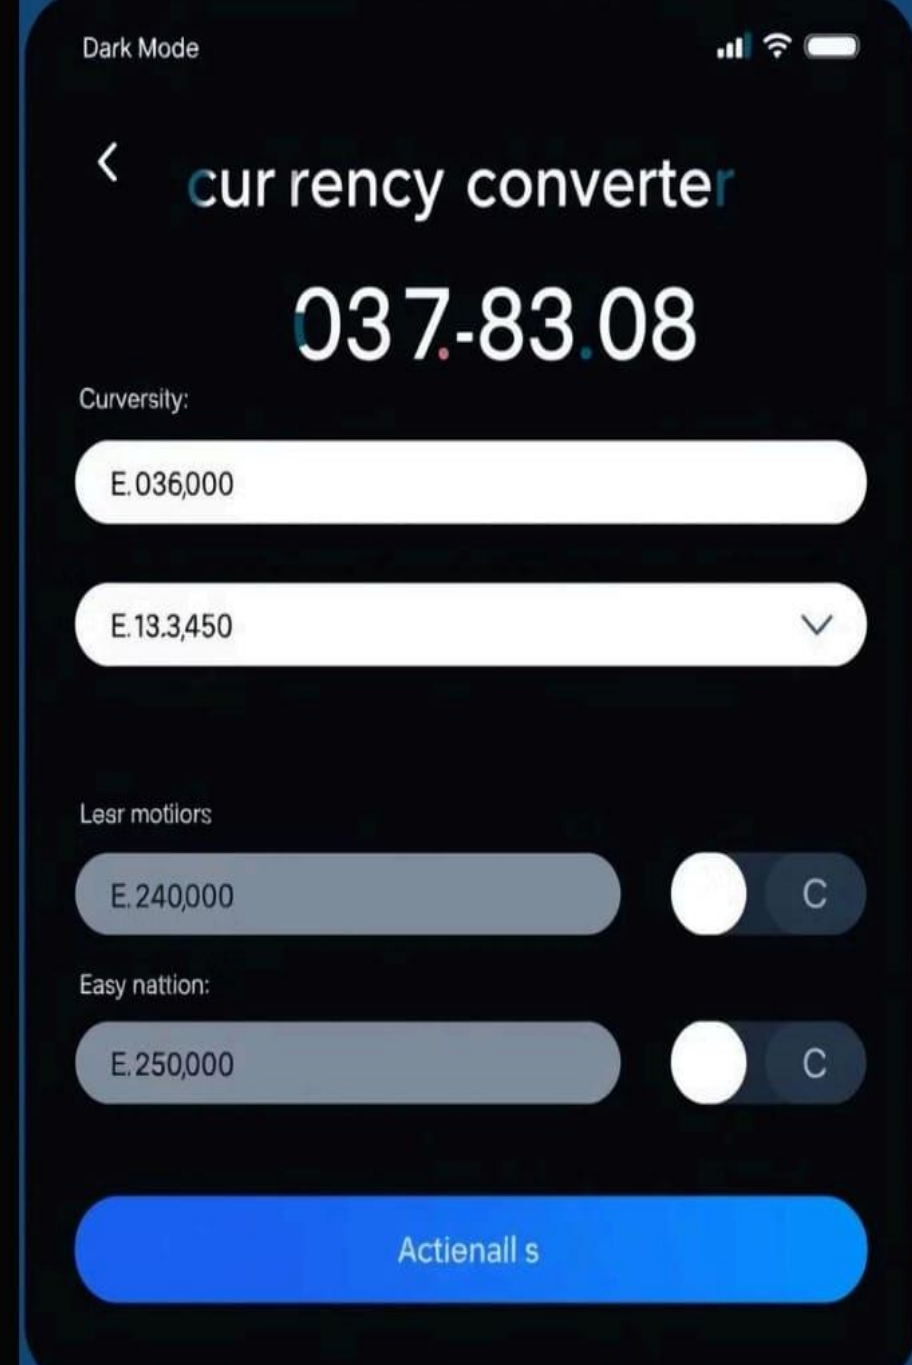

## Fixed Exchange Rates

The converter uses fixed exchange rates, providing consistent and reliable conversion results.

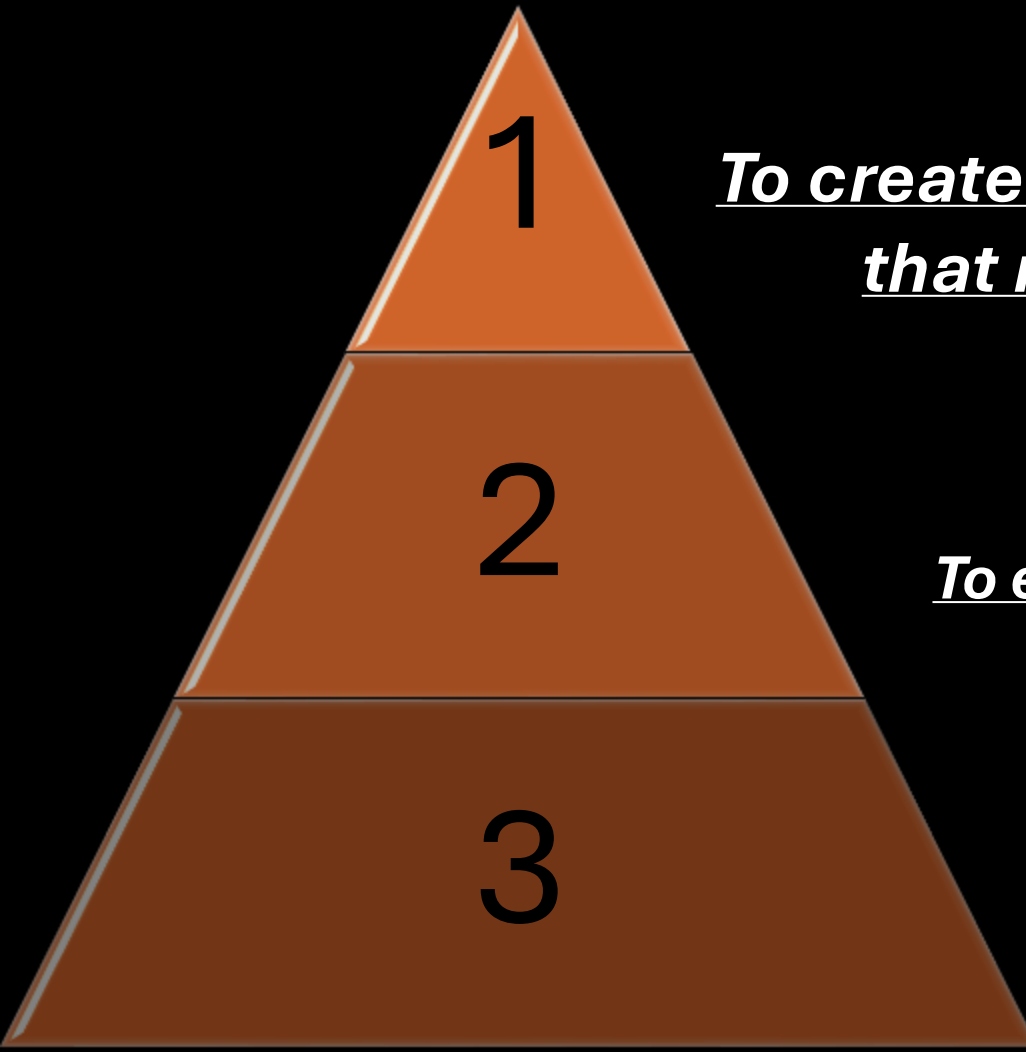

## Conversion History

User can access a history of their previous conversions, allowing them to track their currency conversions.

# **Project Goals**

## **User Satisfaction**

**To create user-friendly & efficient currency converter that meets the needs of our target audience.**

## **Technical Proficiency**

**To enhance our ICT skills by developing a functional & reliable software application.**

## **Collaboration**

**To foster teamwork & collaboration among team members, promoting effective communication.**

## **Future Enhancements**

**1**

### **Dynamic Rates**

**Implement dynamic exchange rates, allowing for up-to-date conversions reflecting real-time market fluctuations.**

**2**

### **Advanced Features**

**Introduce additional features such as currency charts, historical data & alerts for exchange rate changes.**

**3**

### **Mobile App**

**Develop a mobile application for the currency converter, providing user with convenient access on their smartphones.**

# Conclusion

*We believe that our currency converter project will be valuable tool for individual end businesses. We plan to continue refining and enhancing the converter based on user feedback and industry trends.*

***THANK YOU***
